Phase I: Understanding the what and how LHDs collect, store and submit data to various sources.

Deliverable: LHD Informatics Structure Database & detailed report of statewide system utilization.

Phase II: Understanding how LHDs analyze and utilize their direct data sources for effective decision making.

Deliverable: Summary of LHD best practices for Informatics utilization.

Phase III: Understanding how LHDs can access and utilize community level data for decision making.

Deliverable: Development of an official KALHD Stance on:
1. What information is needed by LHDs
2. What data sources provide the best information for LHD purposes
3. Best practices for utilizing this data for decision making
4. Recommendations for improving PH Informatics systems & data
