

## **Assistant Director Report May 17, 2022**

### **KIP Project Updates**

#### **1. HPV Vaccination Resources & Grant Funding**

KALHD is partnering with the Kansas Chapter of the American Academy of Pediatrics to promote HPV vaccination. In addition, we received \$1000 to share it with you all. I've uploaded more information to KALHD's website and if you are interested in promoting HPV vaccination.

#### **2. Immunization Provider Survey**

Continuing to work with the immunization providers to develop a survey for immunization providers in the state to bridge gaps in immunizations. More information to come soon.

#### **3. Vaccination & Mortality Report**

I am working on a report with Sedgwick and Wyandotte Counties on reporting vaccinations and linking them to mortality rates. While this report is specific to a submission for credit, I am hopeful to expand the learnings to other LHDs once completed.

#### **4. Feedback on Immunization Updates**

With the pandemic moving to endemic footing, I would like to get feedback from the group on transitioning the immunizations update to bi-weekly for June 2022 and to monthly by July 2022.

### **Other Projects**

#### **1. Record Retention Handbook**

Continuing work on the record retention documents for LHDs. I am transitioning the separate documents into a handbook similar to the new administrator handbook. I am hopeful to have this done by late summer/early fall (at the latest) since it will take a while to edit and collect information. If you have any information you want included, please send it my way.
